Abdul Hadi

Cyber Security Student

Lahore, Pakistan · abdul.hadi.sec@example.com · abdulhadi.example.com

ABOUT ME

Computer science student focused on cyber security. I enjoy penetration testing, log analysis and capture-the-flag competitions, and I am looking for an internship where I can help find and fix weaknesses before attackers do.

EDUCATION

COMSATS Islamabad, Lahore Campus — Lahore Pakistan

Bachelor of Science in Computer Science — Expected, May 2030

In progress: CompTIA Security+ (exam planned for 2026)

EXPERIENCE

Securenet Labs — Lahore Pakistan (Remote)

Junior Security Analyst (Intern) — June 2025 - present

- Triaged daily SIEM alerts in Splunk and helped cut false positives by about 30% through better alert rules.
- Wrote Python scripts that scan authentication logs and flag brute-force login attempts.
- Documented findings from internal vulnerability scans and followed up on fixes with the IT team.

CUI Lahore CTF Team — Lahore Pakistan

Team Member — August 2023 - May 2025

- Solved web exploitation, forensics and cryptography challenges in inter-university competitions.
- Helped place the team in the top 10 at a national student CTF and trained new members on Linux basics.

PROJECTS

Home Lab Network Monitor

Built a small virtual lab with Kali Linux and Ubuntu servers, and used Wireshark and Nmap to study scans and traffic patterns.

Password Strength Checker

A Python command line tool that tests passwords against common wordlists and gives users clear advice.

SKILLS

Security	Penetration Testing, Vulnerability Assessment, Network Security, OWASP Top 10, Incident Response Basics
Tools	Nmap, Wireshark, Burp Suite, Metasploit, Splunk, Kali Linux
Programming	Python, Bash, SQL, Git & GitHub
